About Disk Archive Corporation

Disk Archive Corporation specializes in developing and supporting high capacity, high availability solutions for long-term storage of large volumes of Media files. Established in 2009, Disk Archive Corporation is a privately-owned company drawing on more than 15 years' experience designing, delivering and supporting Media Storage, Media Asset Management and Archive Management solutions.

About Empress

Empress Media Asset Management LLC is a privately held company providing media asset management and workflow management solutions for broadcast, media and corporate clients including its eMAM Online, eMAM Vault, eMAM Workgroup, and eMAM Enterprise work lines. It is a part of the Empress family of companies, which includes Empress Cybernetics Systems Private Ltd, specializing in customized software development, and Empress Media Inc. one of the largest distributors of blank recording media and production supplies in the country.

About eMAM

eMAM is a powerful media asset management system that handles the file-based workflows of modern organizations from its web or tablet-based interfaces. eMAM manages original content across any combination of local storage systems, storage tiers, archival systems, and cloud-based systems by building an online proxy library with secure access to high-resolution media for all authorized stakeholders.
